

THE ELS CENTER OF EXCELLENCE® PROGRAMS & SERVICES

RUBI Autism Network Parent Training

Many children with autism exhibit behavioral problems, including tantrums, noncompliance, aggression, and self-injury. These behaviors may not only hinder the individual's ability to learn but may also amplify caregiver stress. The RUBI Autism Network Parent Training program teaches parents to use applied behavior analysis techniques to manage their child's challenging behaviors and to teach new skills. This training program is suggested for parents with children ages 3 - 11.

The program includes 11, 1:1 In-Person or Telehealth Sessions. As part of the program, you will receive:

- 1:1 Applied Behavior Analysis education sessions
- Development of a behavior support plan specific to your child's needs
- Direct guidance and feedback regarding your child's behaviors
- A RUBI Autism Network Training Parent Handbook
